I'm passionate about making a difference. When I'm involved with a project at work, I want to do my best to achieve success. I'm a very open and dynamic person. I'm always ready to learn and I'm able to manage deadlines and unexpected complications. In my job as well in my life, I always try to deal with everything with a smile on my face.

I think that having a positive attitude has a direct connection with happiness and success.

Personal interests

Ever since I was a little boy, I have always had a passion for cars. I have always had the passion about the engineering, the design and the art of cars. I also enjoy reading about what the car is capable of doing. When I was six I started collecting small toy cars and parked them up on my study table back at home. Growing up I became more and more interested in engines and their technological evolution.
